

NLRIP Safety Bulletin

Harrow Road

All staff should note that the gate at Harrow Rd / Wrottersley Rd by bridge No. 15 is **not** an approved Track Access Point.

A section of the fence at this location has been removed / damaged creating unofficial access to the track. All project staff are warned that this location **must not** be used to gain access to the track. As the picture clearly shows the access to the track involves coming down a steep muddy gradient which has numerous tripping hazards.

This area will be permanently fenced off in the future. In the meantime a temporary barrier will be put up which all project staff must not pass.
